INTRODUCING THE TEAM

Andi (PM & T1)

Lukman (T2)

Daffa (T2)

Bryan (T1)

Edric (T2)

Kimi (QA & T2)

Team Roles

Team 1

Led by Ghafa as the Project Manager, this team is responsible for the technical execution and overall project delivery.

Ghafa oversees the timeline and workflow, while working alongside Bryan to handle the core development stack.

Together, they manage the Front End, Back End, and Database Engineering tasks to translate the designs into a fully functional and robust application.

Team 2

Comprising Edric, Daffa, Lukman, and Kimi, this group focuses on the project's conceptualization and quality control.

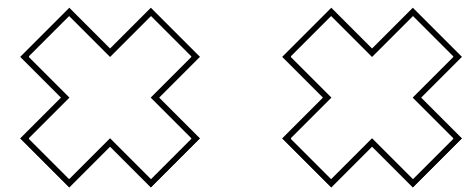

They function as System Analysts and UI/UX Designers to define requirements and craft intuitive interfaces, while also managing technical documentation.

Kimi specifically leads the Quality Assurance efforts, conducting testing to ensure the final product is stable and error-free.

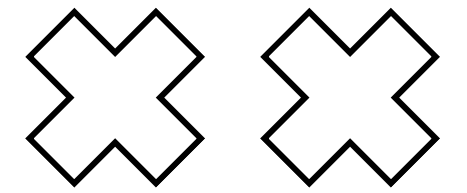

Background

- Students often face overwhelming anxiety regarding career choices
- Traditional academic counseling can be resource-constrained
- Disconnect between academic history and future career potential
- Difficulty in selecting optimal courses to bridge skill gaps

Proposed Solution

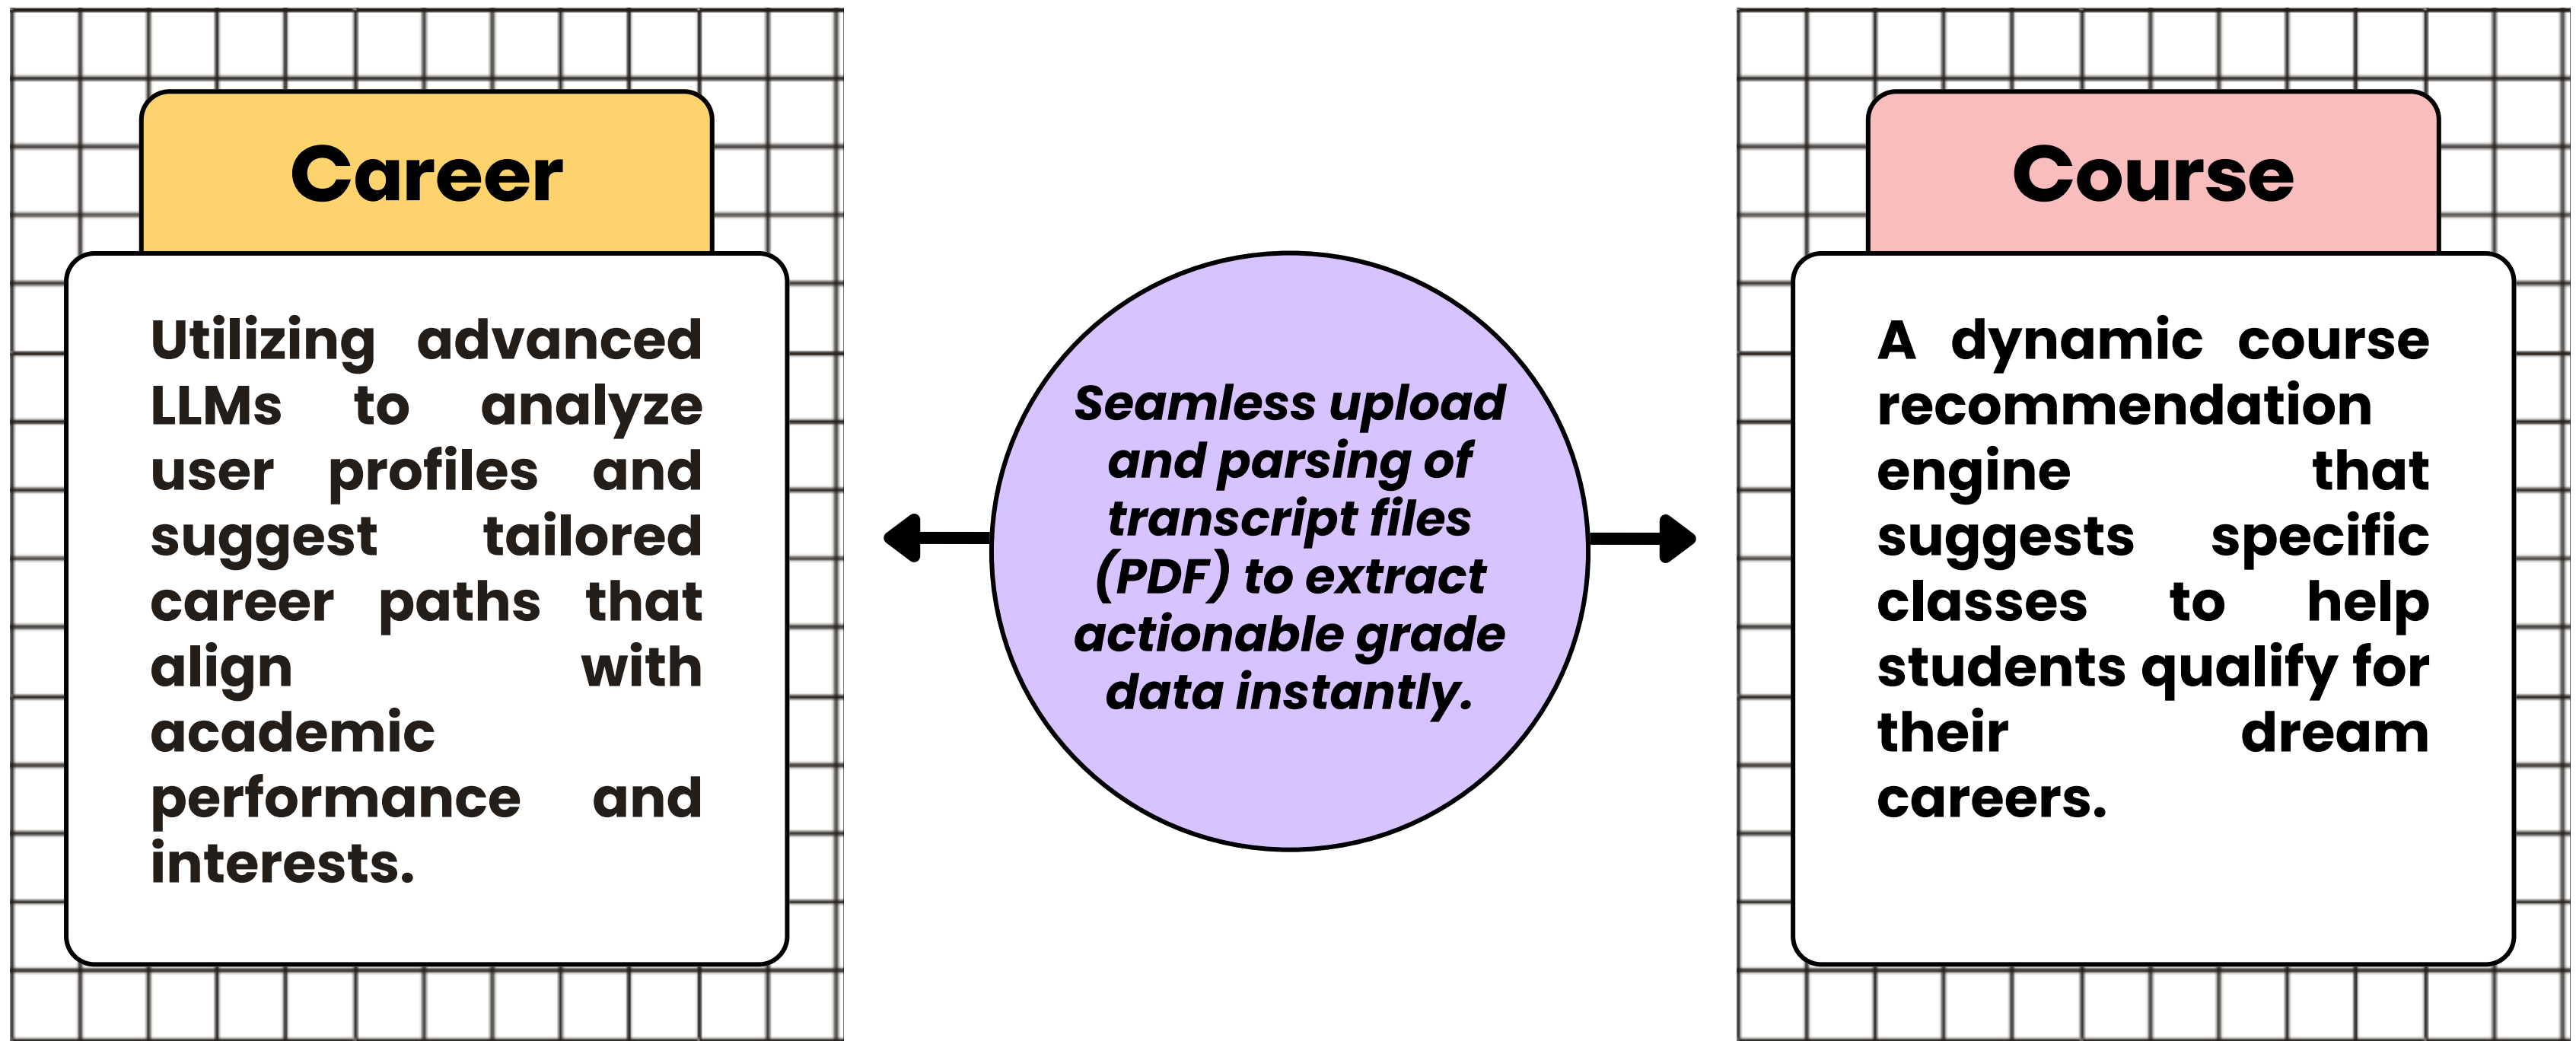

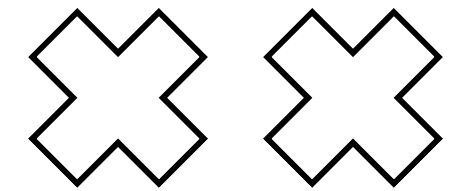

**Automated
parsing of
academic
history to
understand
strengths
and
weaknesses**

**LLM
integration
provides
personalize
d career
matching
based on
real data**

**Intelligent
recommend
ations for
future
courses to
achieve
career goals**

Core Functionality

User Flow

- **Sign up:** User creates an account via secure authentication.
- **Upload:** User uploads their academic transcript for analysis.
- **Process:** AI analyzes grades and subject performance.
- **Result:** Receive tailored career and course recommendations.

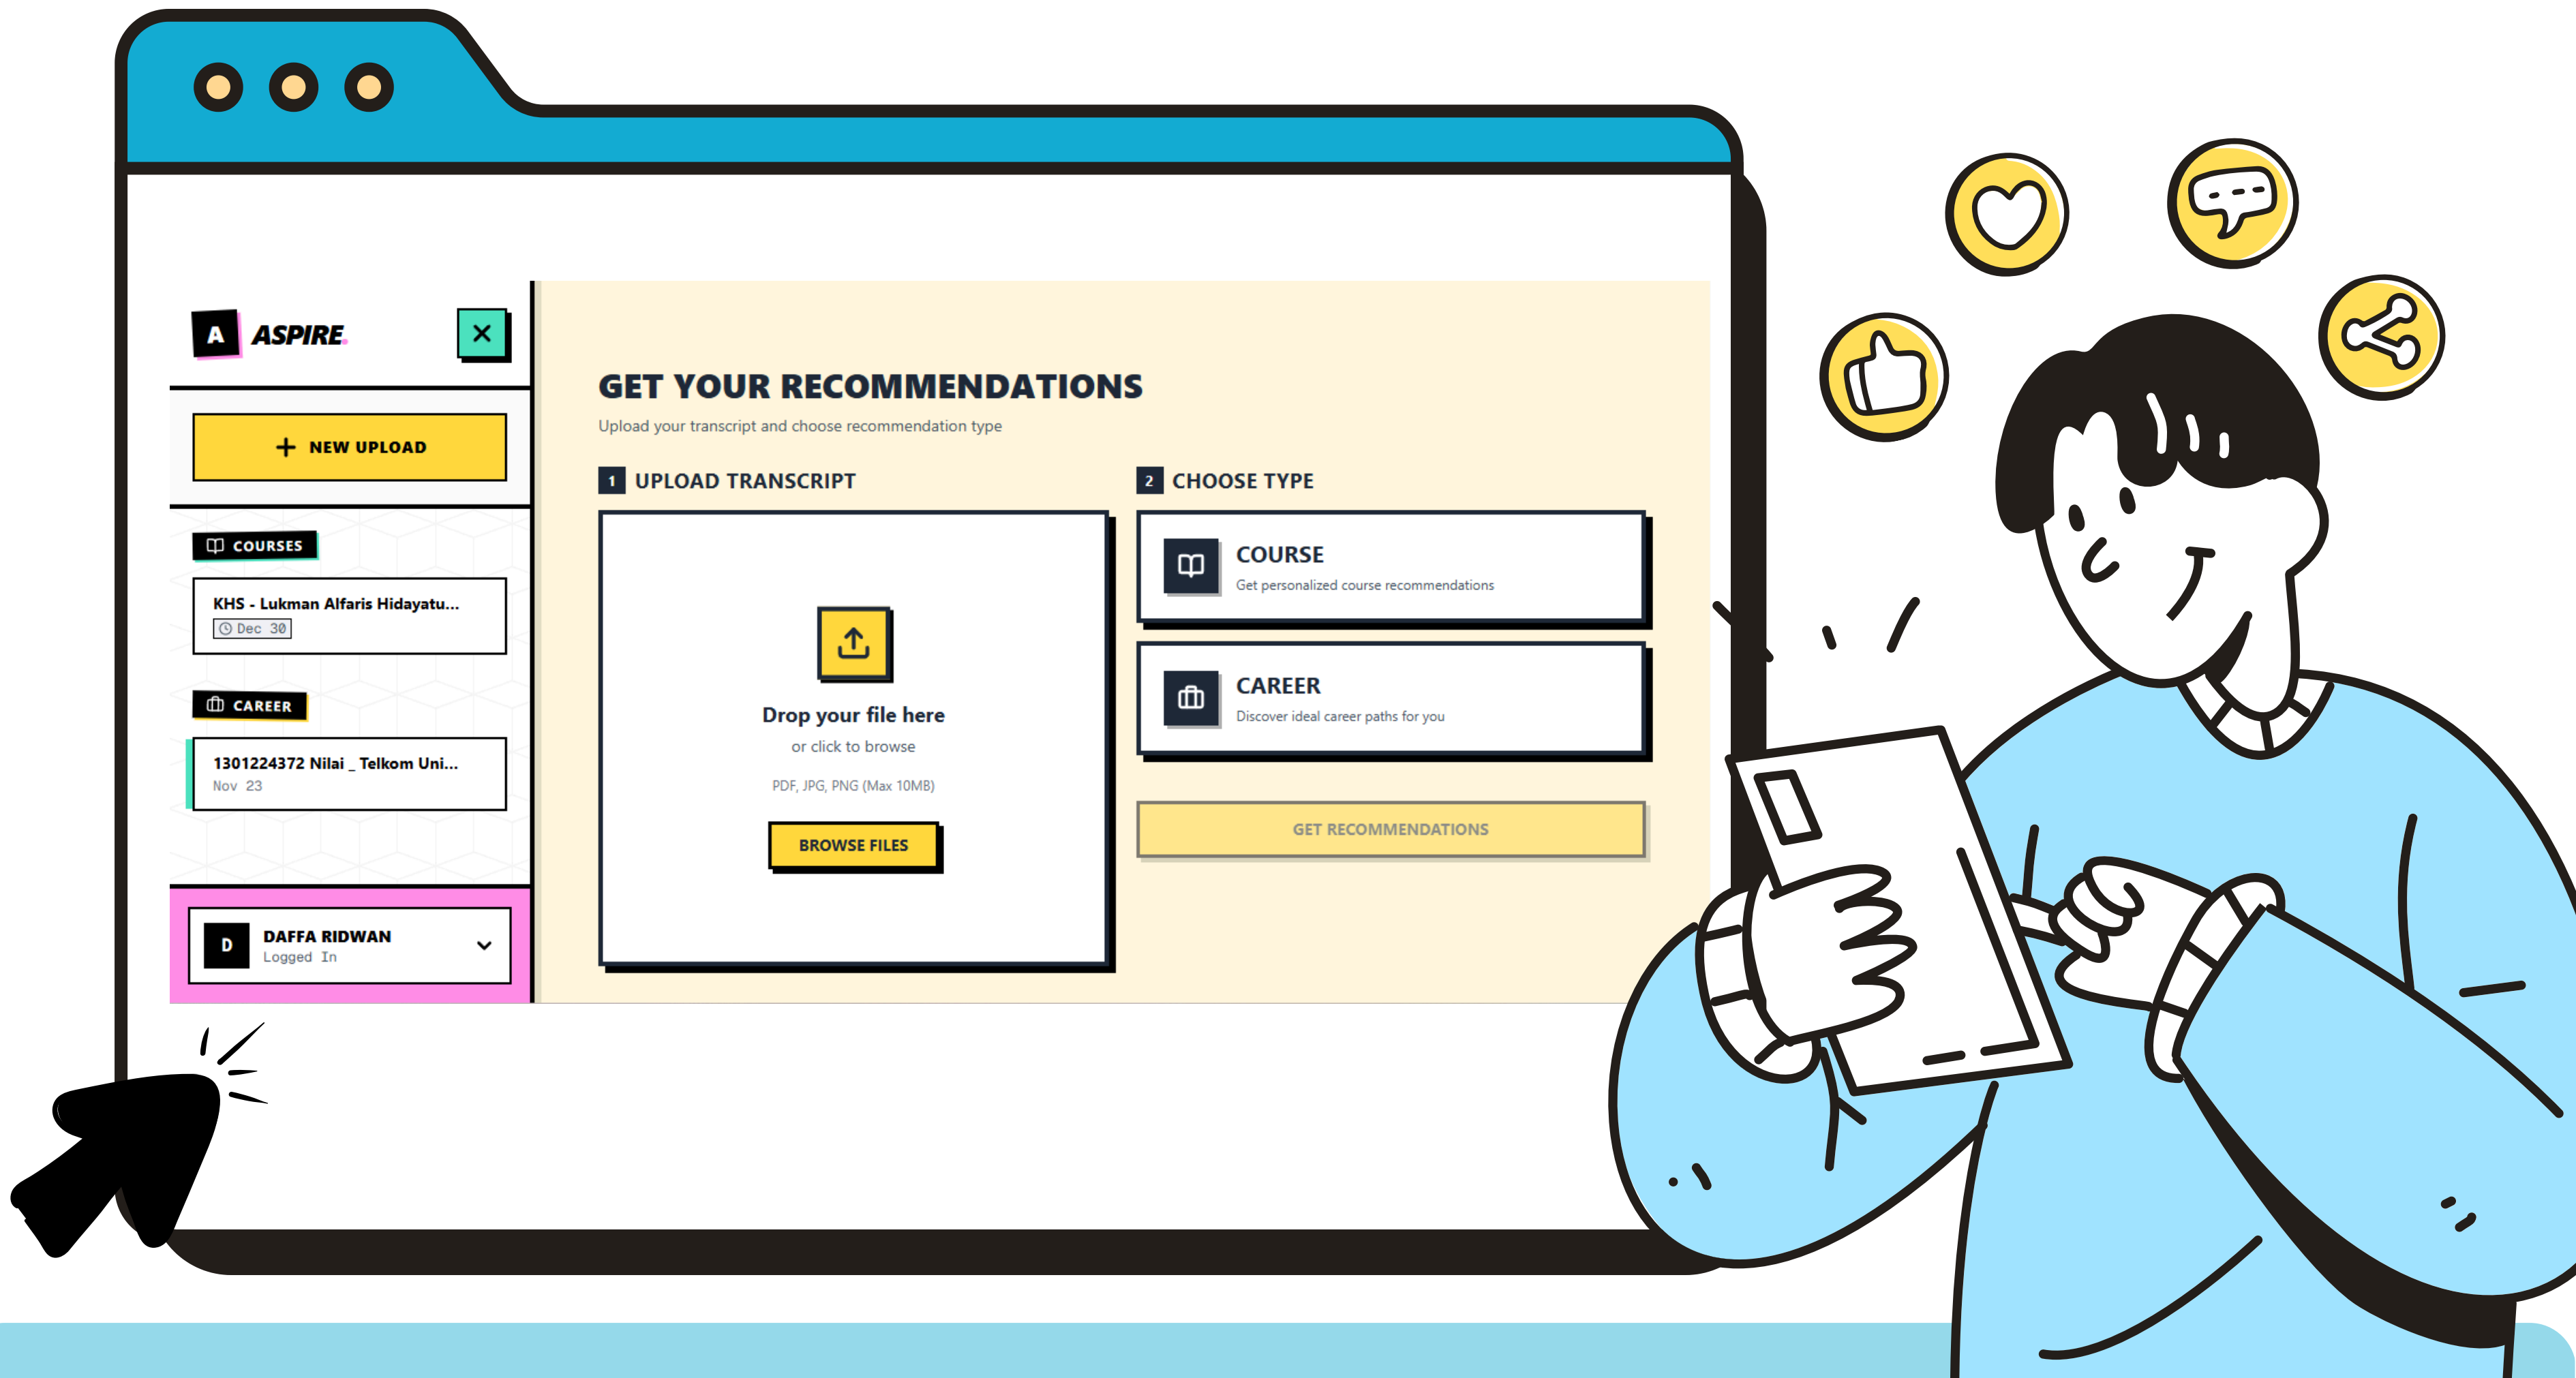

The ASPIRE dashboard provides a clean, modern interface where students can manage their academic profile

Built with Next.js and Tailwind CSS, it ensures a responsive and accessible experience, allowing users to focus on their future rather than navigating complex menus

Intuitive Dashboard

CAREER

CREATIVE BUSINESS COMMUNICATION ANALYTICAL

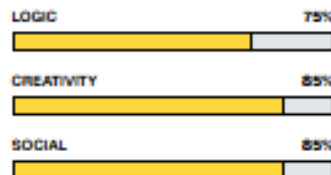

DIGITAL MARKETING SPECIALIST

Leveraging your strong communication skills (A's in languages, AB in presentation), analytical mindset demonstrated by STATISTIKA (AB) and VISUALISASI DATA (AB), and an entrepreneurial spirit (KEWIRAUSAHAAN A), you are well-suited to create and execute impactful online marketing campaigns. Your ability to understand information from 'Wawasan Global TIK' (A) will also be beneficial in reaching diverse audiences.

\$ AVG. SALARY

\$55,000 - \$95,000

ATTRIBUTES

CORE SKILLS

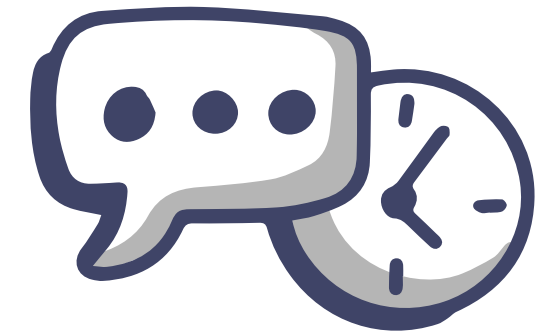

SEO/SEM CONTENT MARKETING
ANALYTICS SOCIAL MEDIA
COPYWRITING

TOOLKIT

Google Analytics
SEMrush
HubSpot
Canva
Facebook Ads

Tech Stack

These tools together form the foundation of our project, ensuring both seamless user experiences and robust backend functionality.

Next.js & TS

App Router framework for robust frontend performance and API handling and type-safe code ensuring reliability and easier maintainability.

MongoDB

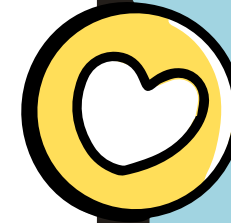

Flexible NoSQL database for storing user profiles and complex transcript data.

LLM Integration

Generative AI logic via custom API routes for intelligent analysis.
